

The City of Zephyrhills Utilities Department has contracted with R&M Service Solutions to conduct our annual fire hydrant testing. This testing is currently underway. During the testing period you may notice brief periods of lower water pressure or slight discoloration of the water, which should clear on it's own.

If you have any questions regarding this, please leave a message at the Water Treatment Operator desk at (813)780-0000 ext. 3546
